

SPOTLIGHT ON JREC EMPLOYEES

Schaefer turns over CEO keys to Harris

June 1 marked the day when Interim General Manager Mike Schaefer (in photo at right) “turned the keys to the co-op” over to Kurt Harris as he began his new role as general manager/CEO. Kurt has been working alongside Mike since last November, making for a smooth transition.

“Mike is a man of great integrity who believes in doing the right thing,” Kurt said. “I was fortunate to work alongside him to gather some of his extensive knowledge and enjoy his sense of humor.”

Kurt began his career at JREC as an apprentice lineman. From there, he earned his journeyman’s license and has also served in the roles of meter technician, general foreman, operations manager, and most recently as the assistant manager.

“We will continue to work on improving our overall infrastructure, safety, and service reliability as technology continues to emerge. I want to make sure we embrace this technology in ways that benefit our members,” Kurt said.

Mike’s Farewell: “Eleven months ago, I stepped into the interim CEO role here at Jump River Electric not sure what to expect. Ultimately, it has been one of the most enjoyable times of my 38-plus year co-op career. It has been both an honor and a privilege to serve the members of JREC, and to share what knowledge and experience I have been able to. I leave you feeling good about the board operations, the management team chosen to take the co-op into the future, and for having worked with such a well-oiled machine, some of the best employees in the industry, well-tuned into providing the best service for the members of JREC as job #1. Thanks again to all for this opportunity. Now, I must return to retirement and the good life!”

Welcome, Ben

“I’m excited to be able to work in the area where I grew up,” said Ben Valentin, who recently joined JREC as a third-year apprentice lineman in Hayward. The variety and excitement this profession offers led Ben to pursue an Electrical Power Distribution degree from Chippewa Valley Technical College. With a cup of hot coffee in hand, Ben spends his time bow hunting and working around the farm when he is not working for you.

Welcome, Ben!

Harris completes co-op management program

Kurt Harris recently completed NRECA’s Robert I. Kabat Management Internship Program (MIP). This comprehensive, six-week program is broken into three blended learning units (in-person and online are required) that provide in-depth analysis of the functions and processes of co-op management. More importantly, it emphasizes practical applications of these key competencies. Onsite portions of MIP are held in the

Fluno Center for Executive Education at the UW-Madison. This facility offers business leaders and corporate teams a dynamic learning experience. At left: Kurt receives his certificate from NRECA’s Gary Pfann.

Employees honored for safety record

Safety is our number one priority as our desire is to send everyone home safe every day. Recently, the above employees were recognized for their years of service and for having no lost-time accidents: (L-R) Lineman Kevin Wright and Member Service Representative Denise Zimmer, 20 years of service; Billing Clerk Tammy Bloomer, 5 years; and Line Superintendent Joe Donnellan, 20 years. Inset: Lineman Marcus Olesiak, 5 years. Combined they have worked 161,672.50 hours without a lost-time accident.

CHANGE HABITS FOR SAVINGS AND IMPROVED RELIABILITY

As a member of JREC, you know how to make smart energy choices that help you save money. But did you know that *when* you use electricity can be just as important as how much you use?

The “Wisconsin’s Wakeup Call” article on page 12 of this magazine explains how real the risks are of experiencing rolling blackouts. This information isn’t being shared to panic anyone, but it’s important to understand that what we once thought could only happen in Texas or California could happen in Wisconsin this summer.

You may have heard terms like “Peak Alert” or “Full Load Control” used in the past to identify times when members are asked to reduce their energy consumption. Due to the current situation in our energy market, members may be asked, with minimal advance notice this summer, to reduce electricity use to help avoid rolling blackouts. This scenario is what is being called a Maximum Generation Event (Max Gen). Max Gen Events occur due to a shortage of generation resources.

What can you do to prevent a Max Gen Event?

You can participate in JREC’s load management program, which helps to maintain balance on the power grid. Every member can help reduce energy use every day through the Summer Shift program. It only takes a slight modification of daily habits to make a difference.

Individuals who rely on electrically powered oxygen

or other medical equipment should always have their own personal backup plan for coping with power outages and other potential emergencies. If your life or the life of a loved one depends on electricity, you need to develop a personal emergency response plan.

The goal of the Summer Shift program is to shift non-essential electricity use to before 11 a.m. or after 7 p.m. When you shift the time you do some of your energy-intensive chores, you reduce energy consumption, save money by eliminating the need to buy energy at higher prices, and help avoid rolling blackouts. Here are a few ways to save energy:

- Set the hot water heater to 120 degrees. Use cold water for laundry and other tasks whenever possible.
- Let clothes hang to dry.
- Wash dishes in an ENERGY STAR dishwasher instead of by hand. This can save a home \$111 per year. Let dishes air dry.
- Cook your meal with the microwave or grill out.
- Close curtains and shades to help your home feel cooler, longer. A ceiling or table fan throughout the afternoon will help circulate air.
- Utilize a programmable thermostat. Set the temperature to 78 degrees when no one is home.
- Charge electric vehicles overnight.

Find additional ways to save energy at home at jrec.com/home-energy-savings or www.energy.gov/energysaver.

MEMBER APPRECIATION DAYS ARE BACK!

A fun three-day event is being planned in August!

A picnic lunch of brats, hot dogs, baked beans, chips, ice cream, milk, coffee, and soda will be served from 10 a.m. to 2 p.m. at each of the following locations:

August 10 – Jump River Community Center
August 11 – Hayward Office, Hayward
August 12 – Ladysmith Office, Ladysmith

All members are invited to come and join your friends and neighbors for an old-fashioned cookout!

POWER COST ADJUSTMENT

Members were informed at the recent annual meeting and in the June issue of this magazine that they could expect to see a Power Cost Adjustment (PCA) on their energy bill in the coming months. During times of rapidly changing costs, a PCA is used as an interim way to provide flexibility to the cooperative’s existing retail rates without having to completely restructure the existing rate plans. The PCA is used to ensure that expenses to the cooperative will be recovered each month. You can find more on how a PCA is calculated under Member Policy 6A-PCA at jrec.com/bylaws-policies.

We may be looking for you!

JREC has several former members who have not cashed their capital credit checks that were paid out in 2019. The list of names is also published on our website at www.jrec.net. Please contact us at 715-532-5524 or jrec@jrec.com ONLY if you know the current address of someone listed. In cases where the person is deceased, please call us if you know the contact information for a relative or benefactor who may have rightful claim to the capital credits. Any unclaimed checks will revert to the Wisconsin Federated Youth Foundation, Inc., a charitable tax-exempt trust established by the Wisconsin Electric Cooperative Association for educational purposes. *(list continued from last month)*
